

Amendments to the Specification:

Please replace the paragraph beginning at page 4, line 32 with the following amended paragraph:

FIG. 2 depicts overall survival in vaccine, chemotherapy and vaccine+chemotherapy groups, in accordance with an embodiment of the present invention. Overall survival was defined as the time from first diagnosis of brain tumor (de novo GBM in all cases) to death due to tumor progression. Kaplan-Meyer survival plots with censored values in open circles are shown for each group. Broken line: chemotherapy group; solid thin line: vaccine group; solid bold line: vaccine+chemotherapy group. Survival of the vaccine group was identical to that of chemotherapy group ($p=0.7$, log-rank). Survival of vaccine+chemotherapy group was significantly greater relative to both survival in the other two groups ($p=0.047$, log-rank), and greater than survival in the chemotherapy group alone ($p=0.02$, log-rank). Survival of the vaccine group tended to be lower ~~but~~ and was ~~not~~ statistically different than that of the vaccine+chemotherapy group (~~$p=0.05$, log-rank~~).
